HEIFER 2

IDEAL FOR YOUNG HEIFERS PRIOR AND DURING JOINING THROUGHOUT THE MID-LATE DRY SEASON

HFR 2 is specifically designed for young heifers for continued growth and development to ensure they are at the right body condition and weight at the correct time of the year for a successful gestation.

Conception rates in 1st and 2nd calf heifers are producers biggest challenge and can be expensive if heifers performance is compromised due to lack of nutrition. Supplementing heifers with HFR 2 throughout the mid-late dry season will provide heifers with the nutritional balance they require to reach desired pregnancy rates.

Example of possible nutrient levels

HFR 2 Nutritional Specifications (% as fed basis)	
Urea Equivalent	25.06 %
Crude Protein	9.35 %
Equivalent Crude Protein	71.92 %
Total Crude Protein	81.27 %
Calcium	5.12 %
Sulphur	2.84 %
mj ME/kg	3.52
Phosphorus	4.17 %
Sodium	6.12 %
